

2. Create Custom Object Access (additional access to project objects if needed).

3. Create Dashboard Editor (Create/Customize Reports & Dashboards permissions).

4. Assign to relevant users.

Activity 3: Configure Sharing & OWD

Steps:

1. Go to Setup → Sharing Settings.

2. Set Organization-Wide Defaults:

- Students (Student__c): Public Read/Write.
- Courses (Course__c): Public Read/Write.
- Enrollments (Enrollment__c): Private.

3. Save.

For Instructor access to assigned Enrollments, optionally:

- Add a User lookup on Enrollment (Instructor User).
- Use a simple Record-Triggered Flow to set OwnerId = Instructor User so they can see only their own records.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce user interface to verify the proper functioning of all implemented features of the Student Enrollment & Course Management System (SECMS). These include student, course, instructor, and enrollment record creation; validation rule checks for mandatory fields, eligibility, and enrollment constraints; verification of record type behavior for different course categories; flow execution for automated enrollment approvals and seat availability checks; and Apex trigger functionality to ensure automatic confirmation and record updates. Additionally, screenshots of generated reports and dashboards were documented to validate accurate data visualization, enrollment tracking, and performance monitoring. Submit the Screenshots while testing.

8. ADVANTAGES & DISADVANTAGES Advantages ● Centralized data ● Automated workflows ● Real-time reporting Disadvantages ● Salesforce dependency ● Requires initial configuration effort

9. Conclusion:

The Salesforce Student Enrollment & Course Management System successfully streamlines the entire student academic lifecycle—from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting. By leveraging Salesforce’s automation tools such as validation rules, flows, approval processes, and dashboards, the system improves data accuracy, operational efficiency, and decision-making. This project demonstrates how Salesforce can transform manual academic processes into a scalable, reliable, and user-friendly digital solution.

10. FUTURE SCOPE • Payment gateway integration • Student self-service portal • Analytics-driven insights

• Mobile access support 11. APPENDIX • Source Code: Salesforce Configuration • Dataset: Salesforce Objects • GitHub / Demo: Salesforce Developer Org
